

# Graphics for Design - Spring

## Assignment 2

### Create a Portfolio of Your Work

You will be creating a portable portfolio of your work. This will be both a PDF that you will email (and upload to your Coroflot or Behance site) as well as a booklet that will be printed. It consists of your work to date. You can include work done outside of your design classes, so long as it's strong and supports your identity.

All books will contain process. Always double-check with the professors in your field to see how much process you will need.

Look at your Identity Design and either make sure you use it throughout your book, or adjust your design. You are not just showing your work, you are expressing who you are. Keep in mind throughout, though, that this document needs to be read, and your work is the star. Do not over-design.

We will start with the PDF, created in single pages. This will be translated to spreads for the printed version.

You can either use one of the templates provided, or design your own format (if you go to Blurb, Magcloud or Lulu, please start with one of their templates).

**The Final package for this assignment includes:**

- Grid
- Style Sheet
- Portfolio PDF Emailed to Instructor
- 1 Printed Portfolio
- Cover Letter
- Business Card
- Envelope or case
