

# Graphics for Design - Spring

## Assignment 2

### Create a Portfolio of Your Work

You will be creating a portable portfolio of your work. This will be a booklet that will be printed as well as a PDF that can be emailed. It consists of your work to date, and can include Foundation pieces if you feel they are strong.

All books will contain process. Always double-check with the professors in your field to see how much process you will need.

Look at your Identity Design and either make sure you use it throughout your book, or adjust your design. You are not just showing your work, you are expressing who you are. Keep in mind throughout, though, that this document needs to be read, and your work is the star. Do not over-design.

You can either use one of the templates provided, or design your own format (if you go to Blurb.com, HP Magcloud or Lulu.com start with one of their templates).

**The Final package for this assignment includes:**

- Grid
- Style Sheet
- Portfolio
- Cover Letter
- Business Card
- Envelope or case
